## Introduction

X4000 Communications is leading and developing a [X4000 5G Innovation Lab](#) to demonstrate 5G capabilities, benefits and value of 5G technology such as high-speed connectivity, high-bandwidth, low latency. This will include multiple customer use cases scenarios to engage new customer sale opportunities.

The 5G Innovation lab is an opportunity for a company participant to demonstrate OEM hardware and software solutions for Open RAN technology which can be demonstrated in Australia and utilised for sales and marketing purpose for engaging new customers. A mutual agreement for all company participants and third parties involved for demonstration and use cases in a controlled innovation lab based on agreed activities and delivery outcomes. Note: Some restrictions may be applied, hardware and software must be Australian compliant and meet local government regulations.
